# 1 Year Re-Incarceration Rate

FY 2012 Releases  
by Frequency of Release FY 2012

The FY 2012 one year re-incarceration rate was 22.2% for all inmates, this is 5.2 % higher than the one year re-incarceration rate in FY 2010 and similar to that in FY 2011. Non-federal inmates who are re-incarcerated have a significantly higher incidence of mental illness, but are similar to federal offenders who are re-incarcerated in most other attributes. Increase in property crimes and reduced levels of social services may have contributed to the increase in re-incarceration rate.
