## AUDIT FINDINGS

### **Narrative:**

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-audit, on-site audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The audit of the Fairview halfway house was conducted on August 31st - September 1st, 2021, by Ian Rachal, Department of Justice certified PREA auditor. Prior to the commencement of the on-site audit, supporting documentation was delivered to this auditor by agency officials for review via the OAS system. Documentation reviewed included agency and facility forms, policies, training curricula, educational materials, and other PREA-related documents demonstrating compliance with the PREA standards.

Upon arrival to the facility, an introductory meeting was held with facility leadership to answer questions and provide expectations for the audit process. I was afforded the use of a private room to interview facility personnel.

The on-site audit of the Fairview facility lasted for two days. A comprehensive tour was conducted of the facility physical plant by this auditor, escorted by facility and agency officials. Observed was the facility configuration, location of cameras and mirrors, staff supervision of residents, room layout including shower/toilet areas, placement of posters and PREA informational resources, security monitoring, resident entrance and search procedures, and resident programming. Private showers and bathrooms were provided for each resident.

The tour of the compound commenced with a visit to the resident living areas, resident program areas, and resident food service area. Each area was supervised by security personnel. There were staff members present in all areas with cameras to assist in supervisory efforts, mitigating any potential blind spots.

Facility personnel who were interviewed showed a thorough understanding of their roles and responsibilities in ensuring residents assigned to the DCDOC are protected from all forms of sexual abuse and harassment. Resident phones were checked to ensure reporting capabilities and all hardware was operable.

## AUDIT FINDINGS

### **Facility Characteristics:**

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate or resident population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Fairview halfway house is a detached brick structure with three levels. The facility has a sixty-bed capacity and is operated by sixteen full-time staff members. The resident's sleeping quarters are located on the first and second floors. The first floor consists of seven rooms for resident sleeping quarters, one resident bathroom, three toilet stalls and four showers, one handicapped bathroom. The second floor consists of seven rooms for sleeping, one resident bathroom. The third floor (Basement level) is used as a multipurpose room, dining room, and computer lab.

The Case Managers Office, Charge of Quarters Office and Assistant Directors Office is located on the first floor. The Administrative Offices are on the second floor. There is an eight-camera video surveillance system that is monitored 24/7 throughout the facility with the exception of the resident's sleeping quarters. There are an additional five cameras monitoring various blind spots around the building. Fairview only houses adult female residents.

## AUDIT FINDINGS

### Summary of Audit Findings:

The OAS will automatically calculate the number of standards exceeded, number of standards met, and the number of standards not met based on the auditor's compliance determinations. If relevant, the auditor should provide the list of standards exceeded and/or the list of standards not met (e.g. Standards Exceeded: 115.xx, 115.xx..., Standards Not Met: 115.yy, 115.yy ). Auditor Note: In general, no standards should be found to be "Not Applicable" or "NA." A compliance determination must be made for each standard. In rare instances where an auditor determines that a standard is not applicable, the auditor should select "Meets Standard" and include a comprehensive discussion as to why the standard is not applicable to the facility being audited.

<b>Number of standards exceeded:</b>	3
<b>Number of standards met:</b>	38
<b>Number of standards not met:</b>	0

All Fairview staff interviewed displayed a thorough knowledge of PREA responsibilities and could articulate the meaning of their zero tolerance policy. Fairview staff understood their roles and responsibilities in the prevention, reporting and response to sexual abuse and sexual harassment. Fairview staff articulated reporting mechanisms for residents and staff to use to report sexual abuse or sexual harassment. All staff were well trained on the PREA first responder's protocols and could clearly articulate the steps they would follow if they were the first responder to an incident.

Residents interviewed responded that personnel treated them with respect. Residents were well-versed in DCDOC's reporting mechanisms and efforts to protect them from sexual abuse and harassment. DCDOC has numerous mechanisms in place for residents, their families, and the general public to report allegations and receive information in regard to PREA and receive assistance for underlying issues of sexual victimization or predatory behaviors. The DCDOC investigators were clearly experienced and knowledgeable, exceeding the requirements of their applicable standards.

This auditor was allowed to speak freely with all offenders and staff during my visit and was treated in a very hospitable fashion. Facility leadership was responsive and knowledgeable. Line staff took great pride in their areas of responsibility and were all trained in regard to the requirements of PREA.
